Project Title	Koyukuk Primary Care Clinic Design
Performance Period	August 15, 2012 through March 30, 2013
Commission Amount	$150,000.00
Match Source(s)	n/a
Match Amount	$0.00

Program Manager Nancy Merriman

Federal Co-Chair Joel Neimeyer

Pursuant to the terms and conditions of the Grant/Award, this Authorization:

This PA represents the Original Budget: $150,000

This Project Authorization serves to establish a new project (DHSS project number 65C-13-203 and ANTHC number AN12-GP5) under this grant award, Koyukuk Primary Care Clinic Design. Alaska Department of Health and Social Services (DHSS) is directed to engage the Alaska Native Tribal Health Consortium (ANTHC) to serve in the capacity of lead project manager on this project scope.

This Project Authorization permits ANTHC to proceed with design of the Koyukuk Primary Care Clinic in Koyukuk, Alaska. Funding from the Denali Commission in the amount of $150,000 is contributed, which includes $25,000 in project management fees to ANTHC. ANTHC shall notify Denali Commission staff of all design progress meetings and invite their participation.

Concurrent to the design process, the Tanana Chiefs Conference and community representatives from Koyukuk shall prepare the Denali Commission Primary Care Clinic Business Plan for this replacement facility. Approval and acceptance of the Business Plan must precede any construction financial support by the Commission. Funding of this clinic design does not represent an obligation or commitment of the Denali Commission to provide financial support for the construction of the designed facility.

ANTHC will engage an architectural firm to design a replacement facility for Koyukuk that site-adapts the 1,500 square foot clinic prototype. The design shall adequately address the site selection and flood risk present in the Koyukuk community, as well as the energy efficiency measures available to incorporate into the design for the long-term sustainability of this facility and the operational (financial) burden to the community.
