## Project Agreement

### Denali Commission FY 09 Funding Assistance

**State:** Alaska

**Project Title:** Elim Barge Landing

**Project Location:** Elim, Alaska

**Parties to the Agreement:** Denali Commission (Commission)

And

U.S. Army Corps of Engineers District, Alaska (Corps)

**Purpose of this Agreement:** This Agreement documents the intent of the parties for the planning and design of a barge landing at Elim, Alaska.

**Authority:** This Agreement is entered into between the undersigned parties pursuant to allocation of funds to Denali Commission as defined in SAFETEA-LU. Denali Commission's Transportation Advisory Committee, through its selection and approval process, has established the intent of the Denali Commission to allocate funds to the Corps of Engineers for the planning and design of a barge landing in Elim, Alaska. The approved funding total is up to \$300,000.

Funds allocated for this project are for the planning and design phase of the project. Amendments to the agreement scope and/or funding level may be implemented to reflect decisions made during the planning and design phase.

**Planning and Coordination:** Efforts associated with the planning and design of a barge landing will include input from the community and others who will use the resulting improvements.

**Project Scope:** The purpose of this work is to plan and design a barge landing in Elim, Alaska. The design will include an outline of reasonable alternatives, approved by the Commission, for marine transfer needs and a record of public involvement that includes a community resolution that contains community responses to the proposed project. Real estate needed for the project will be identified and transfers executed by the local governments. The final design will include plans, specifications, and estimates as well as all approved local, state, and federal permits and applicable construction bid documents.

**Programmed Funding and Schedule:** This project is currently funded at \$300,000 with Denali Commission funds. \$27,090 of this amount is State General Funds appropriated for Denali Commission Transportation projects under SB53, Chapter 30 SLA07, Section 50, 34c.

Quarterly reports will be submitted to the Denali Commission to inform all parties on scope, schedule, and budget status (see Reporting).

The Corps' designated project contact is the Program Manager.

Upon completion of the project scoping, project planning, and preliminary design work outlined above, the Corps and the Denali Commission will hold a final meeting with the community to outline the next steps in project development. Project documents will be available for public review and use within the community, at the Borough, and at the respective agencies.

**Project Purpose and Benefits:** Improved infrastructure will improve barge operations, increase worker, and environmental safety and improve fuel and freight delivery costs.

**Proposed Work FY09-11:**

Planning and Design: The Corps and Denali Commission will meet with Elim to confirm project site location and scope and obtain a resolution of support for the scope of work. Simultaneously, the Corps will acquire existing engineering and environmental data and perform needed geotechnical investigations and/or bathymetric and topographic surveys. Designs for barge landing improvements will be prepared by the Corps. The Corps will determine needed right-of-way and ownership and work with Elim to ensure clear title for the construction phase. The Corps will prepare plans, specifications, and cost estimates for construction contracts as needed. It is anticipated construction will be accomplished through a Corps indefinite delivery/indefinite quantity construction contract.

Environmental Coordination and Compliance: The Corps will work with stakeholders and available literature to identify resources of concern, environmental issues, alternatives actions, environmental consequences, and environmental compliance requirements. The Corps will identify additional data needs, collect site information, and prepare an environmental assessment (EA) or other appropriate NEPA documentation that meet Federal Highways Administration requirements. Required environmental permits and coordination will be identified in the EA/NEPA documents and the Corps will act as the Denali Commission's agent to obtain required pre-award permits and conduct required agency reviews for this project. The Corps will provide environmental documentation to the public for review and will conduct other public involvement in the process as directed.

Denali Commission funds will be used to execute these tasks, up to but not exceeding \$300,000.

Project documents will be available for public review and use by all interested parties.
